

## A GIFT TO GATHER AROUND

CORPORATE BRANDING

There is something primal and innately good about gathering around a fire. Let your brand be in the forefront of customers' minds as they make special memories with friends and family.

Solo Stove makes easy to use, well designed products to make people's lives better. With our corporate etching program, you'll associate your brand with these same values.

Our company is using Solo Stove Bonfire Fire Pits as dealer loader items for display pieces in retail locations. Ole Smoky appreciates your help and we

look forward to working with you in the future.

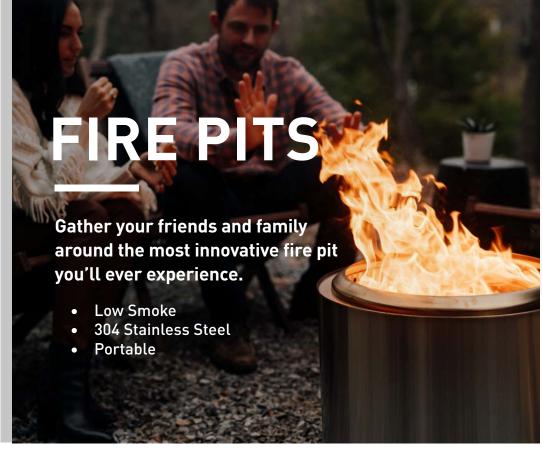

**SOLO STOVE BONFIRE** 

#### FIRE PITS 🔥

Solo Stove fire pits push the limit of combustion airflow efficiency with their minimalist outdoor design. This technology makes it possible to enjoy a smoke free fire followed by an easy clean up. The best part?

You won't leave smelling like a campfire!

### **HOW IT WORKS**

#### 1- Secondary Burn

Vent holes near the top of the burn chamber allow preheated oxygen to fuel the flame, resulting in a more complete combustion and a hotter fire with less smoke.

#### 2- Precision Base Plate

Allows oxygen to feed directly to embers from below. This helps to burn fuel faster and hotter, while allowing consumed ash to fall through the base plate.

#### 3- Ash Pan

Catches loose ash and prevents it from clogging vital airflow. The ash pan also acts as a heat shield preventing your fire pit from scorching the ground beneath it.

#### 4- Airflow

Rising hot air and the absence of oxygen created by the combustion process pull air through the bottom vent holes. This air movement fuels the fire at its base while also providing a boost of preheated air through the vent holes at the top of the burn chamber.
